SUMMARY

I am a frontend developer with a strong foundation in modern web technologies, including React.js, TypeScript, and Next.js. I have experience building scalable and efficient solutions, such as developing a component library using Storybook and TypeScript to streamline UI consistency across projects. My skills extend to creating cross-platform mobile applications with React Native and automating workflows using Node.js, such as designing a Slack bot for employee engagement. Additionally, I have successfully delivered custom Webflow projects for a company, ensuring dynamic content management and brand consistency. My blend of technical expertise and user-centric design, supported by a background in psychology, makes me an ideal candidate for creating impactful digital experiences.

EXPERIENCE

Frontend Development Intern
Umain

09/2024 - 03/2025
Stockholm, Sweden

Umain is a digital product consultancy. We shape, ship and scale digital products at speed. Founded in Stockholm in 2001, we are a growing team of 100+ experts in digital product strategy, design, and technology. We are part of Eidra, a consultancy collective uniting leading companies in consulting, creativity, and engineering.

- Component Library Development: Built a component library using Storybook and TypeScript to streamline UI development. This library was designed to enhance UI consistency and efficiency across projects. I also developed a prototype website in Next.js to demonstrate how these components could be integrated into real-world applications. Sanity CMS was utilized to manage dynamic content, providing a flexible and scalable solution for content updates.
- Slack Bot Automation: Designed and implemented a Slack bot using Slack API and Node.js to automate birthday congratulatory messages, enhancing employee engagement.
- React Native Exploration: Expanded my skill set by learning React Native, focusing on building scalable and visually appealing cross-platform mobile applications.
- Webflow Projects for PCL Company: Designed and developed two custom websites (www.nassal.com and www.nfusionpcl.com) using Webflow's intuitive visual editor and CMS. Integrated dynamic content management for seamless updates and ensured brand consistency. Successfully deployed both sites, leveraging Webflow's streamlined process for efficient iteration and delivery.
